VDR Metal Oxide Varistors Ultra Surge High Operating Temperature 125 °C

LINKS TO ADDITIONAL RESOURCES

3D Models | Design Tools | SPICE Models

QUICK REFERENCE DATA		
PARAMETER	VALUE	UNIT
Maximum continuous voltage in operating temperature range:		
RMS	115 to 680	V
DC	150 to 895	V
Maximum non-repetitive transient current I_{NRP} (8 x 20 µs)	1800 to 13 000	A
Maximum energy (10/1000 µs)	19 to 720	J
Detailed specification	Based on IEC 61051-1 IEC 61051-2 IEC 61051-2-2	
Storage temperature	-40 to +150	°C
Operating temperature	-40 to +125	°C

ORDERING INFORMATION

The varistors are available in a number of packaging options:

- Bulk
- On tape on reel
- On tape in ammopack

The basic ordering code for each option is given in tables titled Varistors on Tape on Reel, Varistors on Tape in Ammopack, and Varistors in Bulk. To complete the catalog number and to determine the required operating parameters, see Electrical Data and Ordering Information table.

Note

- Special lead-configuration as inside or outside crimped leads available upon request

AGENCY APPROVALS

- cUL certificate
- ULus certificate
- VDE certificate

Note

- Agency approval documents, please see: www.vishay.com/ppg?29185&documents

FEATURES

- Low β high purity zinc oxide disc
- Halogen free high temperature resistant silicone coated
- Straight or kinked leads
- Ultra high current surge/size ratio capability up to 13 kA for US20 types
- Certified for operation up to 125 °C according to UL 1449 edition 4, VDE/IEC 61051-1/2
- Material categorization: for definitions of compliance please see www.vishay.com/doc?99912

Pb-free

e3

RoHS COMPLIANT

HALOGEN FREE

APPLICATION

- Overvoltage and transient voltage protection

DESCRIPTION

The varistors consist of a disc of low-ß ceramic material with two solid copper leads (US20 types only) or copper clad steel wire. The wires have a matte tin plating. They are coated with UL 94 V-0 approved silicone lacquer, which provides electrical, mechanical and climatic protection.

MOUNTING

The varistors are suitable for hand-mounting (bulk) or automatic pick and place mounting (T and R). The parts can be connected by wave soldering and pin-in-paste reflow soldering under defined process conditions. Bending of the leads for different angle placement is not recommended.

Typical Soldering

235 °C, duration: 5 s (Pb-bearing)
245 °C, duration: 5 s (lead (Pb)-free)

Resistance to Soldering Heat

260 °C, duration: 10 s max.

MARKING

The varistors are marked with the following information:

- Maximum continuous RMS voltage with - U suffix
- Series numbers
  - 572 for VDRUS07
  - 573 for VDRUS10
  - 575 for VDRUS14
  - 576 for VDRUS20
- Manufacture logo
- Date of manufacture (YYWW)
- Safety marks on VDRUS10-14-20 types

INFLAMMABILITY

The varistors are passive non-flammable. The encapsulation is made of flame resistant silicone in accordance with UL 94 V-0.

			1815	100.0	720	13 000	5	250	10.2	5.8 ± 0.8	VDRUS20Z680ByE

Notes

(1) The products are certified according to cULus (E332800), and VDE (40051495). See Agency Approval section on page1 for certificate download section

(2) The sinusoidal voltage is assumed as the normal operating condition. If a non-sinusoidal voltage is present, type selection should be based on multiplying the peak voltage by a factor of 0.707

(3) The voltage measured at 1 mA meets the requirements of IEC 61051.
The tolerance on the voltage at 1 mA is ± 10 %

(4) High energy surges are generally of longer duration. The maximum energy for one pulse of 10 x 1000 µs is given as a reference for longer duration pulses. This pulse can be characterized by peak current (I_p) and pulse width t_2 (virtual time of half I_p value). If Vp is the clamping voltage corresponding to I_p, the energy absorbed in the varistor is determined by the formula:
$E = K \times V_p \times I_p \times t_2$ where K is dependent on the value of t_2 (see Peak Current as a Function of Pulse Width drawing)

(5) A current wave of 8 x 20 µs is used as a standard for pulse current and clamping voltage ratings. The maximum non-repetitive transient current is given for one pulse applied during the life of the component

(6) For composition of the SAP part number:

Replace “x” by
- B for bulk type
- T for tape and reel
- A for tape and ammopack

Replace “y” by
- S for straight leads
- K for kinked leads (bulk only)
- L for kinked leads with H0 = 16 mm (tape and reel/ammo)
- M for kinked leads with H0 = 18.25 mm (tape and reel/ammo)

(7) All varistors are UL1449 edition 4 recognized as SPD type 5 (component level) for operating temperatures up to 125 °C. The varistors may be used in other SPD types as 2, 3, or 4 depending on the indicated nominal discharge current ratings. The final acceptance of the component is dependent upon its installation and use in complete equipment submitted to Underwriters Laboratories Inc.

ELECTRICAL CHARACTERISTICS

ELECTRICAL DATA		
PARAMETER	**VALUE**	**UNIT**

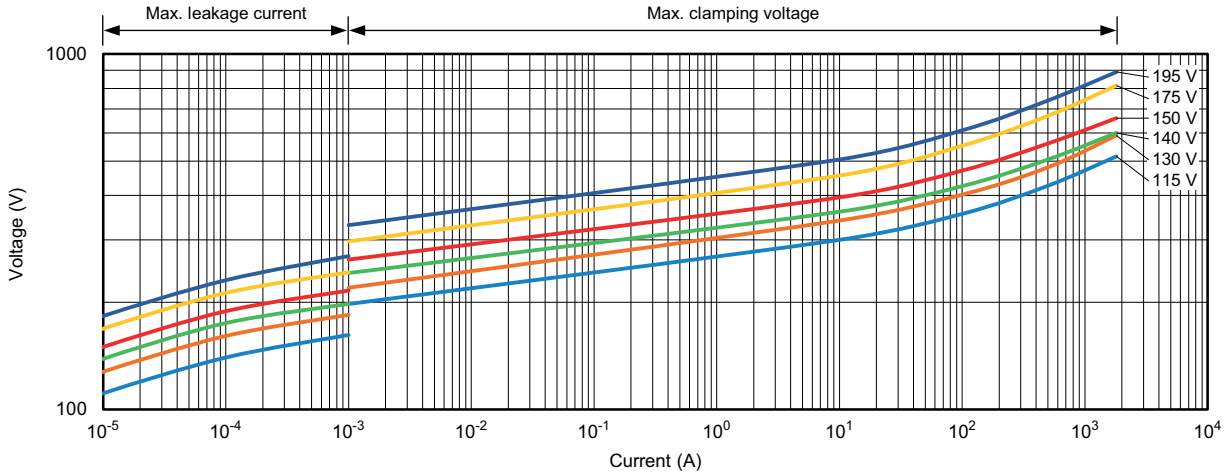
		V > 320 V		12.5	16.5
d	Lead wire diameter		0.6 ± 0.05	0.8 ± 0.05	
F	Lead to lead distance (1)		5.0 + 0.8/- 0.2	7.5 ± 0.8	
H	Distance component to tape center (2)		20.0 + 2.0/- 0.0	18.0 + 2.0/- 0.0	
H_0	Lead wire clinch height		16.0 or 18.25 ± 0.5		
P	Pitch of components on tape		12.7 ± 1.0	25.4 ± 1.0	
T	Total thickness		See Electrical Data table		

Notes

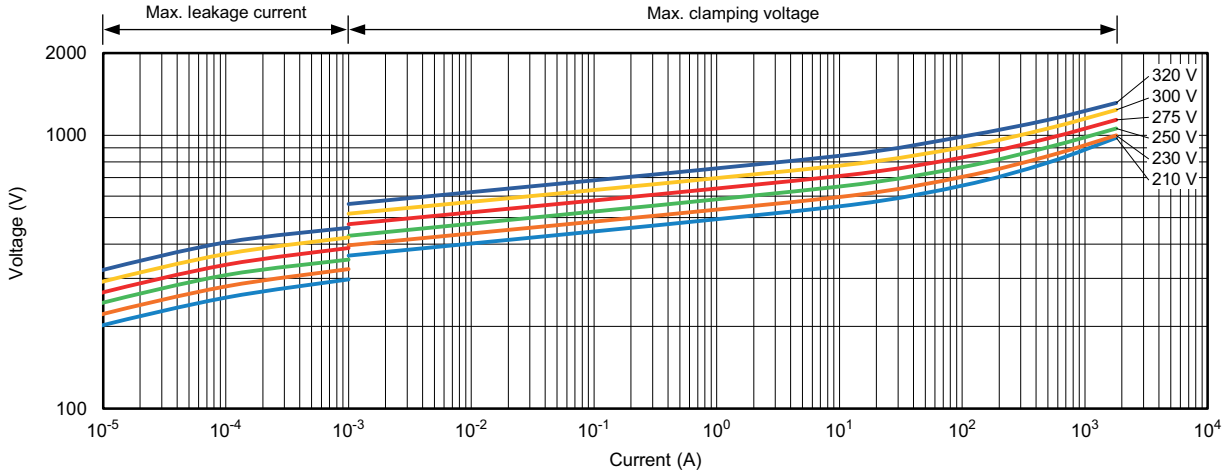
(1) Guaranteed between component and tape

(2) For VDRUS14X510xSE and VDRUS14X550xSE: H = 20 mm ± 1 mm

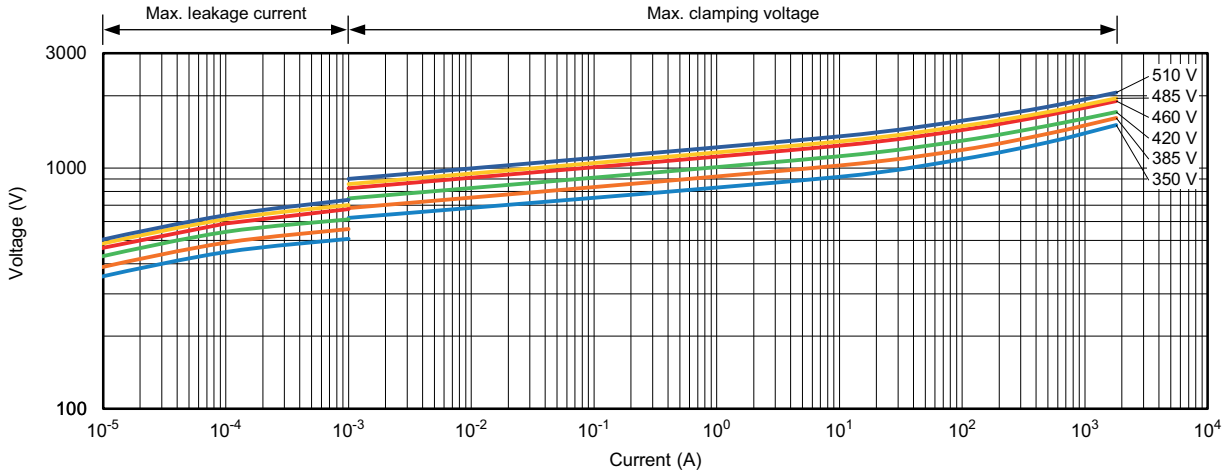
V/I CHARACTERISTICS



115 V_{RMS} to 195 V_{RMS}; VDRUS07

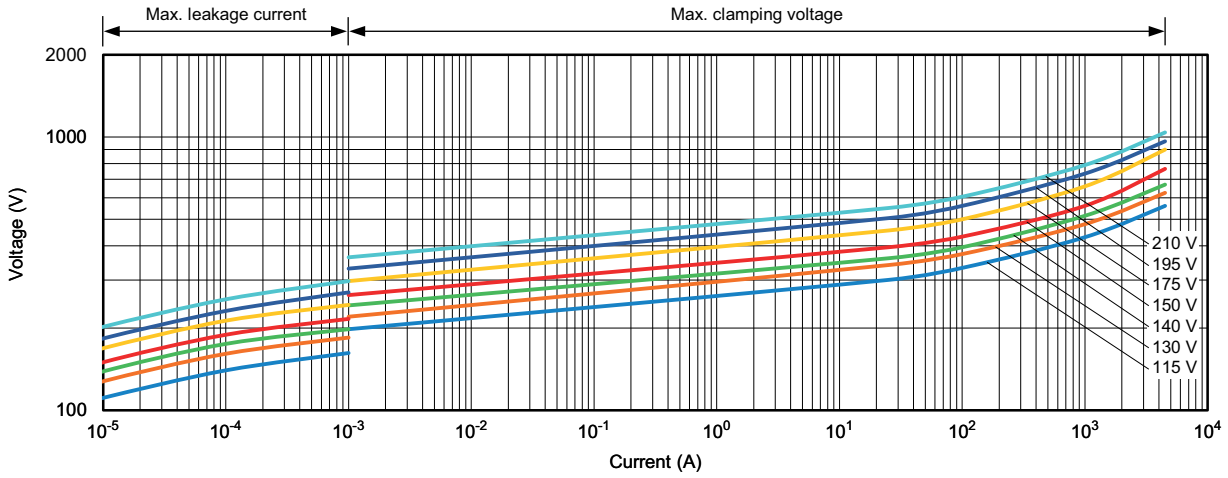


210 V_{RMS} to 300 V_{RMS}; VDRUS07

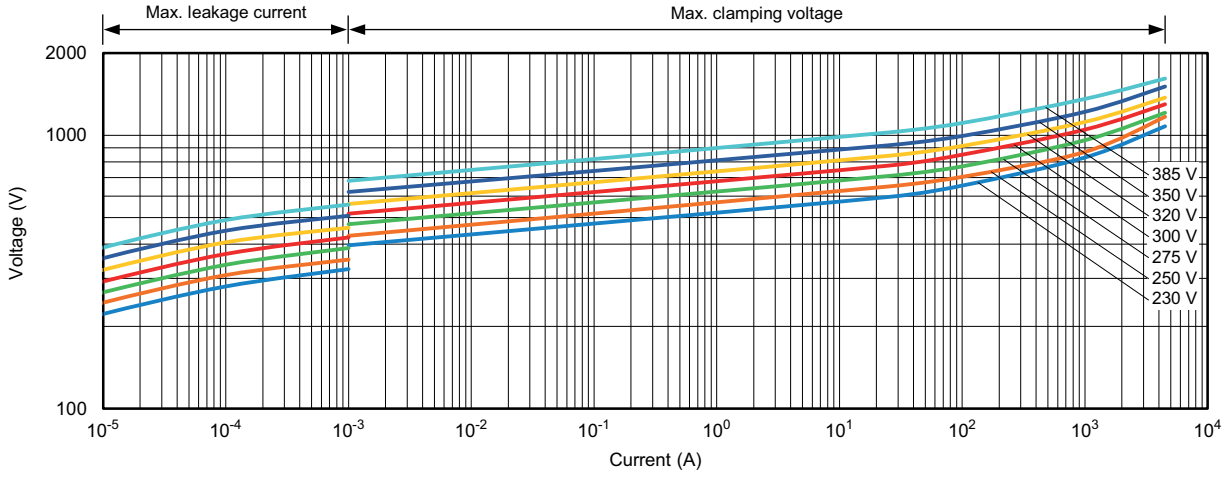


350 V_{RMS} to 510 V_{RMS}; VDRUS07

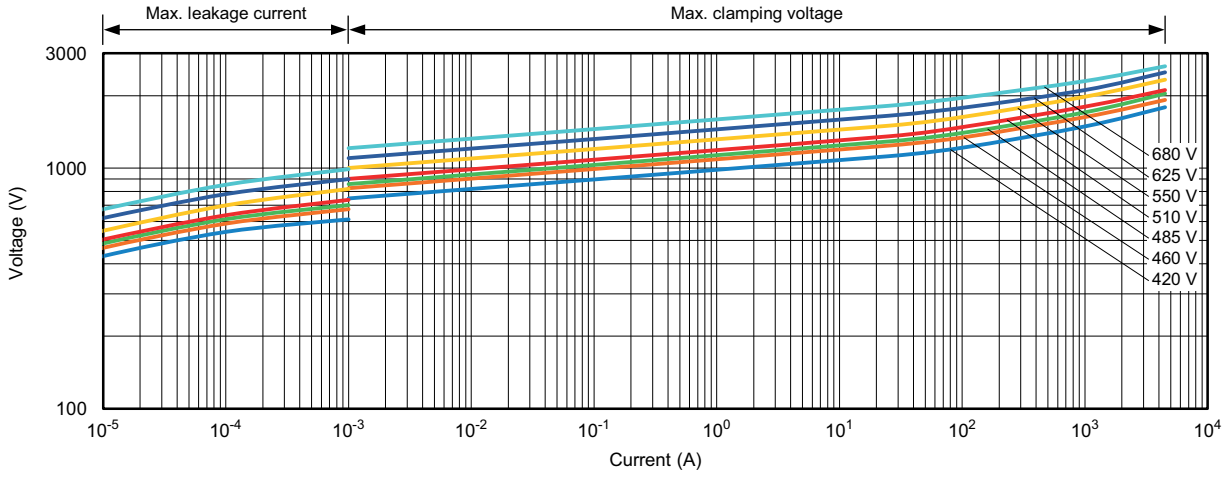
V/I CHARACTERISTICS



115 V_{RMS} to 210 V_{RMS}; VDRUS10

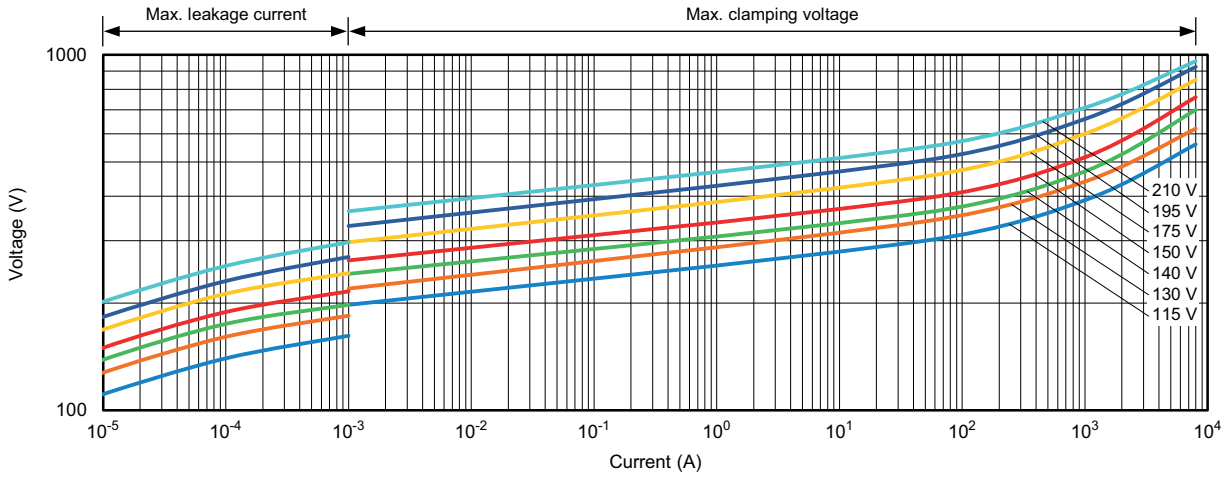


230 V_{RMS} to 385 V_{RMS}; VDRUS10

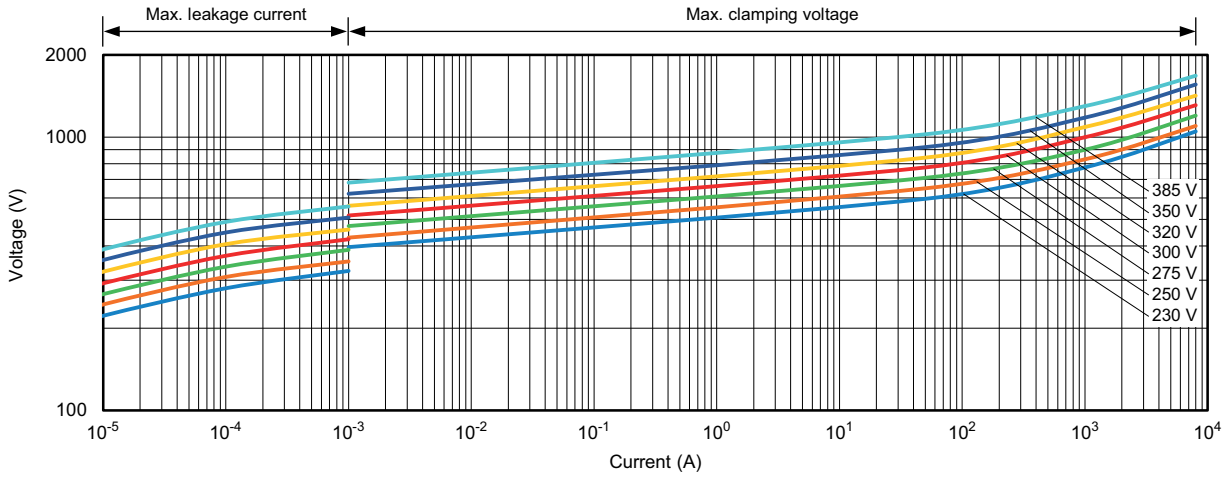


420 V_{RMS} to 680 V_{RMS}; VDRUS10

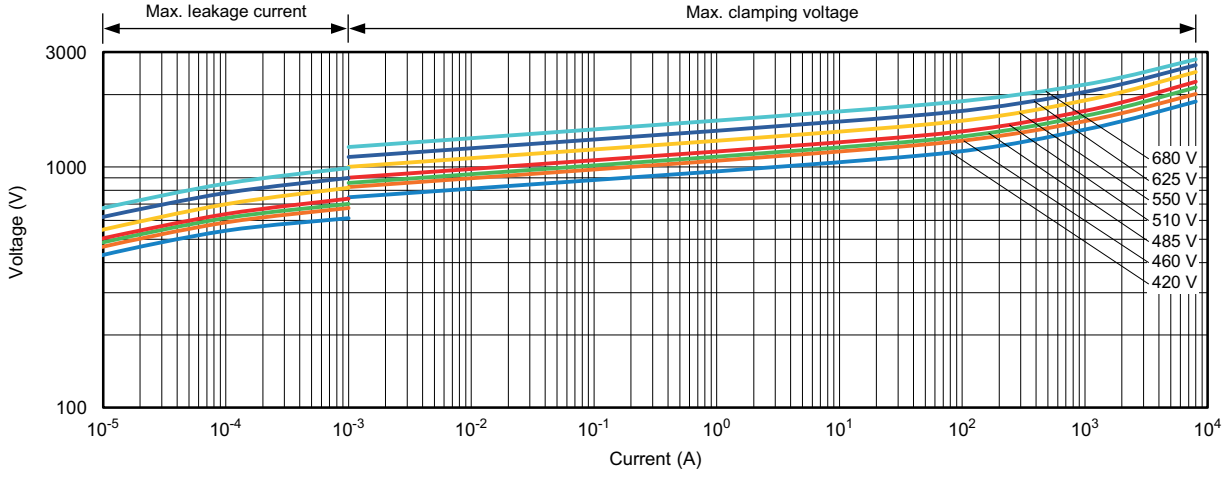
V/I CHARACTERISTICS



115 V_{RMS} to 210 V_{RMS}; VDRUS14

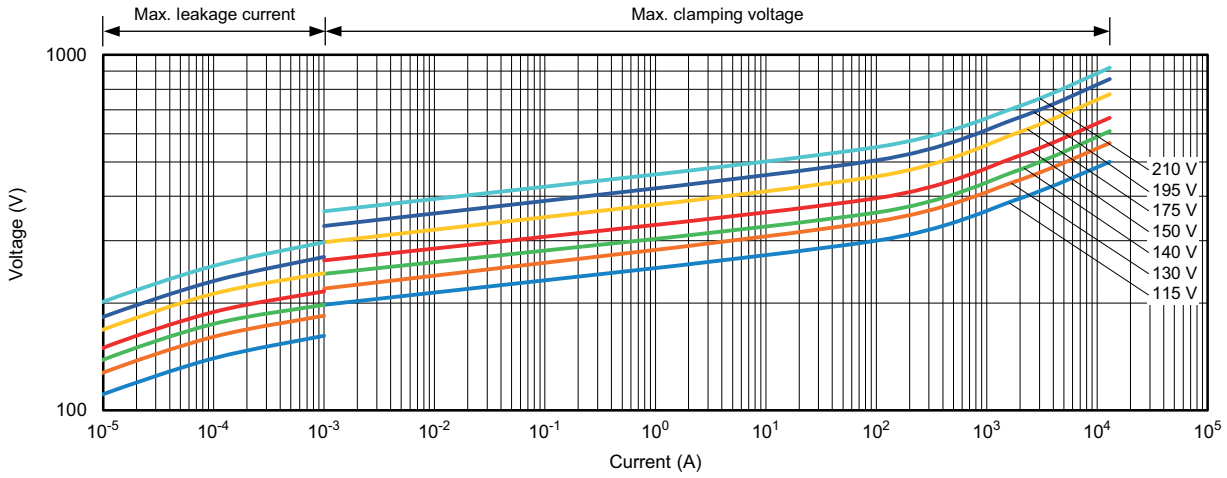


230 V_{RMS} to 385 V_{RMS}; VDRUS14

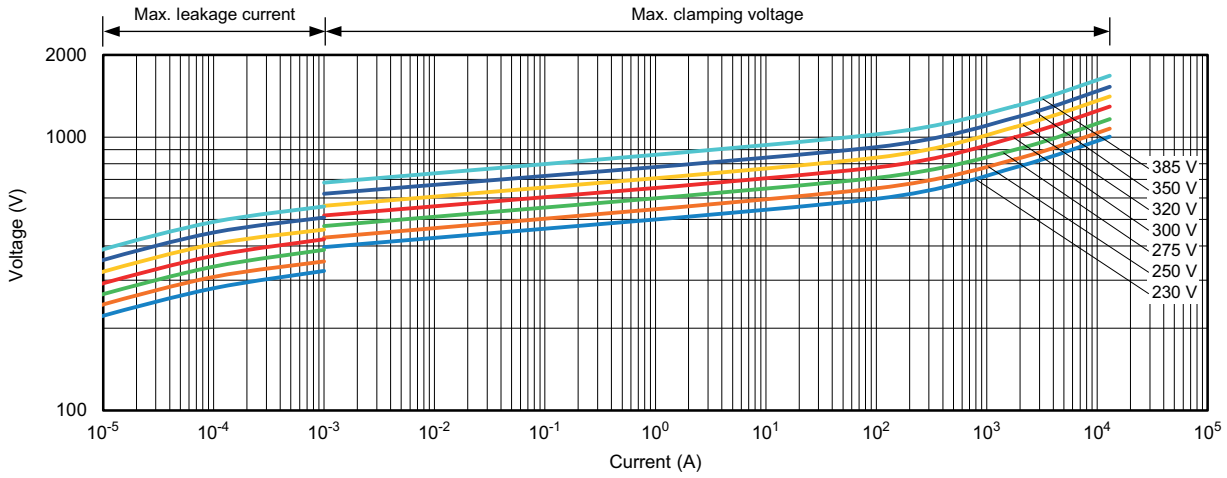


420 V_{RMS} to 680 V_{RMS}; VDRUS14

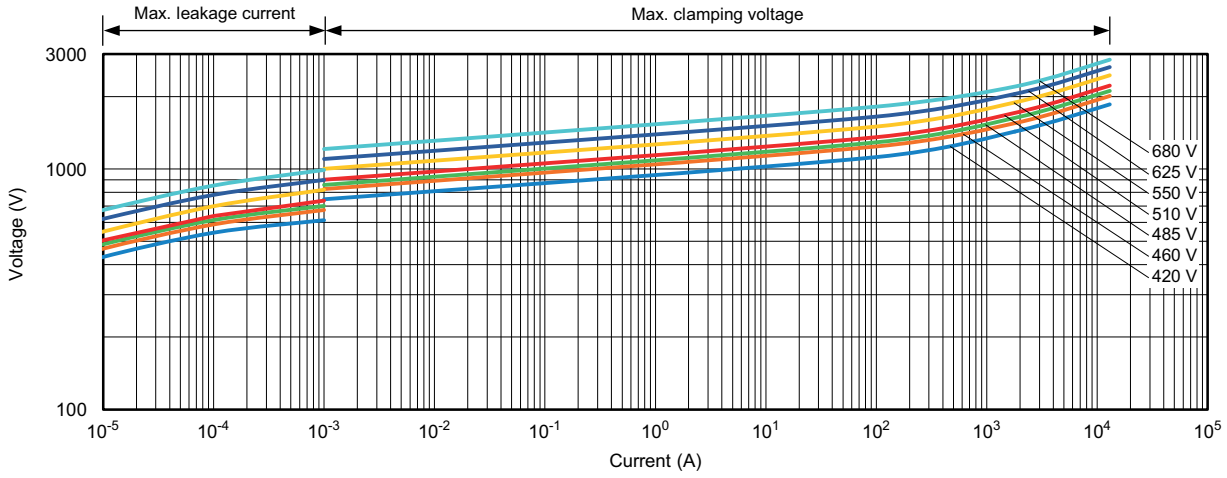
V/I CHARACTERISTICS



115 V_{RMS} to 210 V_{RMS}; VDRUS20

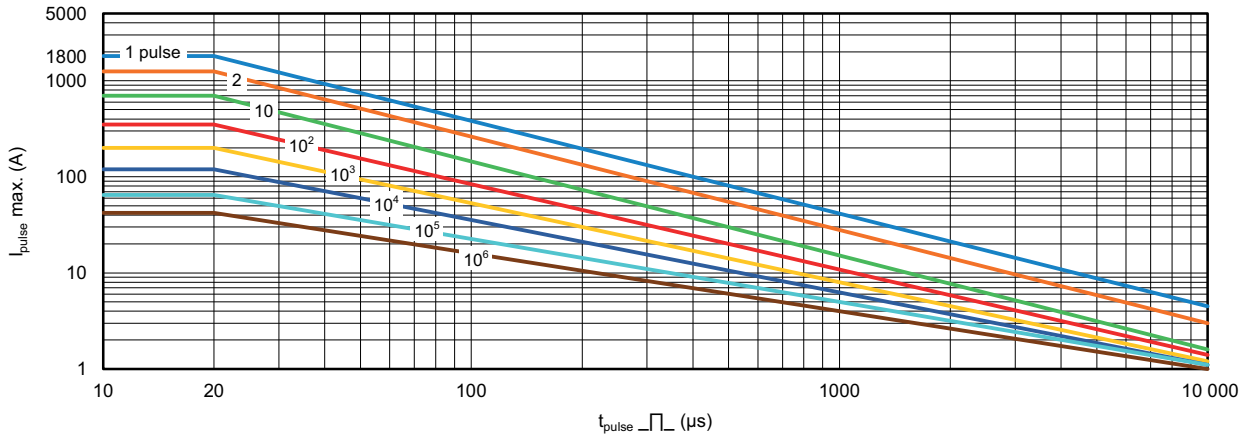


230 V_{RMS} to 385 V_{RMS}; VDRUS20

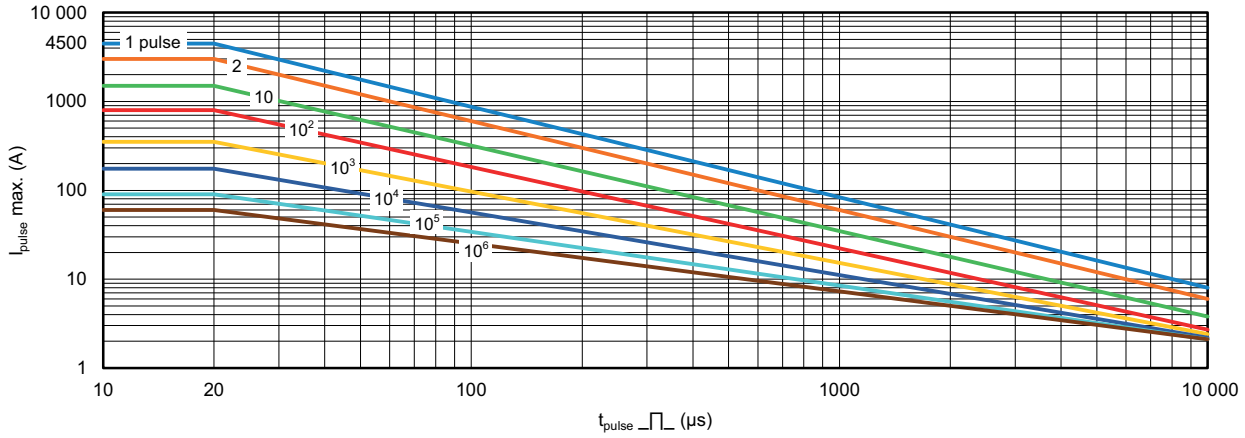


420 V_{RMS} to 680 V_{RMS}; VDRUS20

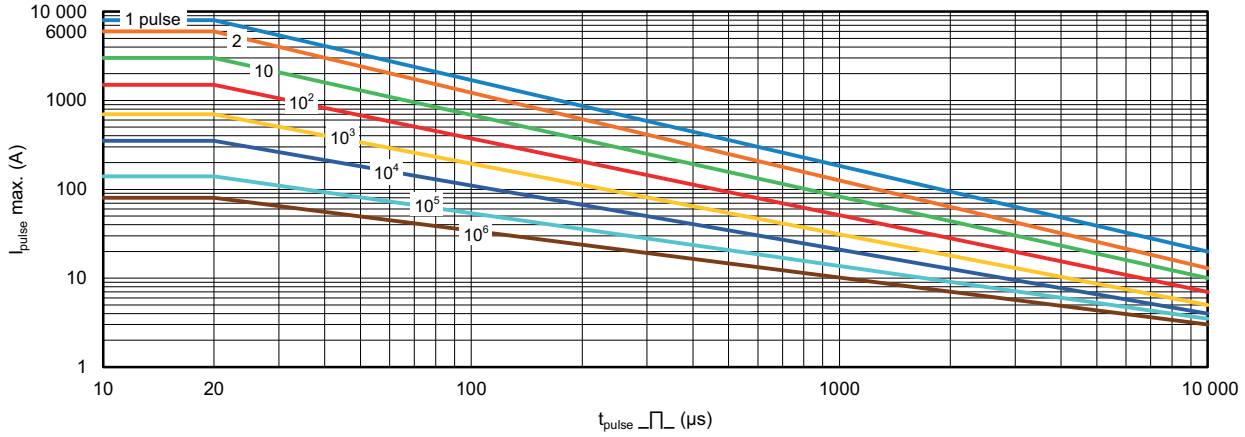
PULSE DERATING



115 V_{RMS} to 510 V_{RMS}; VDRUS07

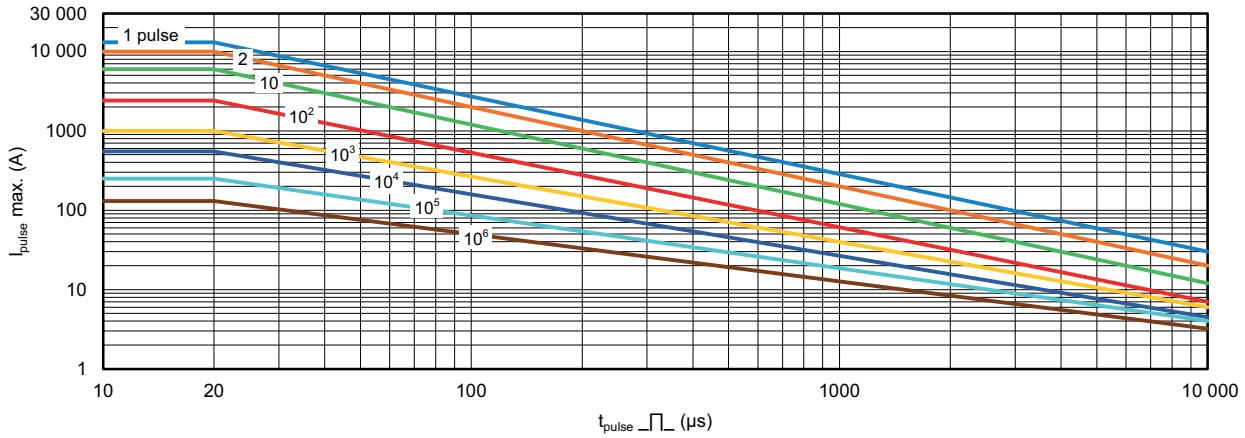


115 V_{RMS} to 680 V_{RMS}; VDRUS10



115 V_{RMS} to 680 V_{RMS}; VDRUS14

PULSE DERATING



115 V_{RMS} to 680 V_{RMS}; VDRUS20

Disclaimer

ALL PRODUCT, PRODUCT SPECIFICATIONS AND DATA ARE SUBJECT TO CHANGE WITHOUT NOTICE TO IMPROVE RELIABILITY, FUNCTION OR DESIGN OR OTHERWISE.

Vishay Intertechnology, Inc., its affiliates, agents, and employees, and all persons acting on its or their behalf (collectively, “Vishay”), disclaim any and all liability for any errors, inaccuracies or incompleteness contained in any datasheet or in any other disclosure relating to any product.

Vishay makes no warranty, representation or guarantee regarding the suitability of the products for any particular purpose or the continuing production of any product. To the maximum extent permitted by applicable law, Vishay disclaims (i) any and all liability arising out of the application or use of any product, (ii) any and all liability, including without limitation special, consequential or incidental damages, and (iii) any and all implied warranties, including warranties of fitness for particular purpose, non-infringement and merchantability.

Statements regarding the suitability of products for certain types of applications are based on Vishay's knowledge of typical requirements that are often placed on Vishay products in generic applications. Such statements are not binding statements about the suitability of products for a particular application. It is the customer's responsibility to validate that a particular product with the properties described in the product specification is suitable for use in a particular application. Parameters provided in datasheets and / or specifications may vary in different applications and performance may vary over time. All operating parameters, including typical parameters, must be validated for each customer application by the customer's technical experts. Product specifications do not expand or otherwise modify Vishay's terms and conditions of purchase, including but not limited to the warranty expressed therein.

Hyperlinks included in this datasheet may direct users to third-party websites. These links are provided as a convenience and for informational purposes only. Inclusion of these hyperlinks does not constitute an endorsement or an approval by Vishay of any of the products, services or opinions of the corporation, organization or individual associated with the third-party website. Vishay disclaims any and all liability and bears no responsibility for the accuracy, legality or content of the third-party website or for that of subsequent links.

Except as expressly indicated in writing, Vishay products are not designed for use in medical, life-saving, or life-sustaining applications or for any other application in which the failure of the Vishay product could result in personal injury or death. Customers using or selling Vishay products not expressly indicated for use in such applications do so at their own risk. Please contact authorized Vishay personnel to obtain written terms and conditions regarding products designed for such applications.

No license, express or implied, by estoppel or otherwise, to any intellectual property rights is granted by this document or by any conduct of Vishay. Product names and markings noted herein may be trademarks of their respective owners.
